Telescope, mount, and camera specs

- **Telescope:** CDK17
  - D = 0.43m, f/6.8 FL = 2960 mm
  - Plate scale = 0.070 arcsec / micron
- **Camera:** SBIG STXL-6303E
  - 3072 x 2048 format [FOV 32' x 21.5']
  - 9 $\mu$  pixels (0.63 arcsec/pixel)
  - Dark current: 0.3 e/sec at 0° C
  - 1.47 e/ADU 16 bit
  - Full frame download 4 sec

- **Mount:** Bisque Paramount ME
  - German equatorial
  - 6 deg/sec slew (max)
- **Filter wheel:** SBIG FW8G
  - 8 position: L,B,V,R,H, 3 unused (50mm round unmounted filters)
  - Autoguider camera:

---

## Port Assignments

- Serial COM ports
  - COM 1 = dome
  - COM 6 = mount
  - COM 4 = Focuser
  - COM 5 = All sky camera
  - COM 7 = Telescope mirror heater (actually USB port with USB-serial dongle)

---

## SBIG guider camera

- 4.88 mm x 3.66 mm (5.67' x 4.27')
- Displacement 14.4mm = 16.8' (see figure\_)

---

## Observing procedure: Periodic error correction calibration

TBD

---

## Observing procedure: Auto-guiding

TBD

---

Observing procedure: Mosaicing

TBD

---

Observing procedure: Spectroscopy

TBD

---

---
